

June 25, 2008

To whom it may concern:

I supervised Mr. James Eckerson from March through June, 2008. Mr. Eckerson developed both 2D and 3D graphics, and he did a good job on the tasks that were given to him. He finished tasks on time, took work home when needed, and proposed innovative solutions. Mr. Eckerson is very personable and got along well with everyone he worked with. I recommend Mr. Eckerson for employment.

Sincerely,

Robert Anschuetz
Training Section Manager

To Whom It May Concern:

James Eckerson worked with my team on the 92W30 Water Treatment Specialist BNCOC project since from January 2007 to September 2007. During that time James created a number of models and animations needed for completion of the project.

Despite the fact that he was located in a different state and the primary means of communication was through instant messaging with my Lead 3D Modeler, it was very easy to coordinate our efforts with James. James understood right away what needed to be done and he completed and delivered assignments in a timely manner. Furthermore, the quality of the models he provided was outstanding, with very few corrections and adjustments needed to “streamline” them with the rest of the models.

My Lead 3D Modeler wrote about him:

“Above all else, I admired the fact that he was able to adapt to my way of working – learned the tricks I use when modeling and texturing and followed suggestions when it came to animating. Because of this there was no clashing and no time was wasted figuring out how to compromise on our work styles.”

Overall, working with James was pleasant, and he provided excellent support to our center and on this project.

Respectfully Submitted,

Linda R. McCafferty, PMP
Director, Training Division
